Red Lands Roses

Haute Couture Roses since 1996

From Kenya with love

WHO ARE WE ?

Nestled in the heart of Kenya, Red Lands Roses is a testament to passion, innovation, and sustainable luxury. Founded by Dr. Isabelle Henin Spindler, a visionary French agronomist, our journey began in the early 90s when Dr. Spindler, captivated by Kenya's untapped potential, set out to create something extraordinary: luxury roses, cultivated the sustainable way.

In 1996, our dream blossomed into reality with the establishment of our farm in Ruiru, just 35 kilometers northeast of Nairobi. Situated at an altitude of 2000 meters and basking in the Equator's warmth, this fertile land became the canvas for our exquisite creations. Our commitment to quality and longevity led us to specialize in a stunning array of over 200 rose varieties, including luxury spray, garden, mini, and T-hybrid roses.

But what truly sets us apart is our dedication to innovation and environmental stewardship. Spanning over 35 hectares of previously non-arable land, our roses thrive on a 100% hydroponic system, showcasing the harmonious blend of nature and cutting-edge technology.

Yet, our story goes beyond blooms; it's about fostering growth and empowerment. With a team of over 900 passionate individuals, we've not only cultivated exceptional roses but also uplifted our neighboring communities. Our efforts have garnered international recognition, with accolades from esteemed organizations like UN Climate Neutral Now, One Carbon World, and the Kenya Flower Council, to name a few.

At Red Lands Roses, every petal tells a tale of luxury, sustainability, and community impact. Join us in celebrating a journey that transcends borders and blooms with beauty and purpose.

@ Red Lands Roses Plc

BEHIND EVERY Rose THERE ARE People

One of our biggest commitment is to empower our team of over 800 people, with many colleagues having career with Red Lands Roses right from the start. Among them, more than 55% are women.

How do we contribute to their welfare?

Day care Center : accommodating up to 70 children from 3 months to 3 years old, for free, financed by the sales of our roses at our shop in Nairobi.

Education : financing school fees for 2 kids per family until graduation from high school.

Health : providing health insurance to all our employees, their spouses and children, with a fully functioning clinic on site as well.

Women empowerment : promoting gender equality, contraception and fighting against female genital mutilation and gender based violence.

Mobility : providing all employees with a bicycle, replaced every 5 years, to commute to work and promote exercise.

Food : subsidizing hot meals at lunch time (75% of the cost supported by the company).

Salary : supporting our employees with a salary 55% higher than what is recommended by the Kenyan horticultural standards. Mothers also get paid time off to breast-feed post delivery.

Our commitment to support the community doesn't stop at the farm : Alongside partners such as the German Development Bank, we raised 3 million shillings for House of Mercy Children's Home, primarily to fund school fees. House of Mercy provides a safe, healthy and loving environment for children who have either been orphaned, abandoned, abused, living with HIV/Aids or physical disabilities. They currently house 65 children.

LIMITING OUR Impact

Did you know that **roses grown in Kenya** and sold in Europe produce **5.5x fewer greenhouse gas emissions** than those raised in the Netherlands even taking into account air transport ?

This is because of our ideal climate : 2000m above sea-level and proximity to the Equator which provides 12 hours of sunlight and stable temperatures, resulting in zero need to artificially heat and light our greenhouses.

Red Lands Roses is proudly **CARBON NEUTRAL CERTIFIED** since 2020. We measure and offset our carbon footprint through our operations and finance forestry projects.

Our other environmental-friendly initiatives :

- **Soil-less hydroponic cultivation** system fully recycling ferti-irrigation solutions, with no rejects of phosphate and nitrates in groundwater.
- **Water recycling and treatment** of every drop of water used.
- **Solar energy** providing 30% of our power needs.
- **Paper sleeves packaging for our roses** absorbing moisture, keeping flowers fresh and eliminating single-used plastic.
- **Carton boxes** made out of recycled paper paste.
- **Planting of our roses on non-arable land** not suitable for food crop or cattle raising.
- **Tree planting** activities at the farm and across Kenya.
- **Sheep raised** to cut grass as biological lawn mowers.

Fun fact :

One of our varieties, the Wangari Maathai, was named after Kenyan social, environmental and a political activist and the first African woman to win the Nobel Peace Prize. Red Lands Roses committed to donate 0.06 EUR to her cause, The Green Belt Movement, from the sale of each stem.

OUR Certifications

1. KENYA FLOWER COUNCIL

Kenya Flower Council (KFC) Flowers and Ornamental Sustainability Standard is a code of practice that ensures compliance on social, environment and good agricultural practices aspects to ensure certified producers foster sustainable, responsible and safe production of cut flowers and ornamentals.

The audit scope covers Human Resource Management, Health & Safety, Crop Production, Postharvest Management, Environment Conservation, Trainings and Machinery maintenance.

Red Lands Roses has been awarded KFC Silver Certificate renewed on annual basis.

The KFC standard incorporates Global GAP standard and Kenyan Standard (KS1758).

2. ONE CARBON WORLD NEUTRAL CERTIFICATION

Red Lands Roses has achieved One Carbon World Neutral International Standard by measuring, reducing and compensating its carbon footprint.

Carbon neutrality refers to achieving net-zero carbon dioxide emissions by balancing emissions with carbon removals i.e. carbon offsetting.

Carbon emissions arise from production activities, transportation, energy use, water use, waste generation, purchased goods and services.

The farm actively assess and implement opportunities to reduce emissions through adopting integrated pest management system, 100% recycling system, green waste composting system, introduction of paper tags and eliminating plastic sleeves, tree planting projects, frequent inspections and maintenance of farm machinery.

3. MPS ABC CERTIFICATION STANDARD

Red Lands Roses has been awarded MPS ABC certificate qualification A.

MPS-ABC provides the Company with insights into its relative environmental performance and provides a management system that helps companies to become more sustainable.

The standard focuses on usage records on the environmental themes of crop protection agents, fertilizers, energy, waste and water.

4. BLUE COMPANY CERTIFICATION

Red Lands Roses is a certified corruption free company. It rejects all forms of corruption since it recognizes the harmful effects that it may have on its business, employees and communities.

UNDERSTAND THE CATALOG

This catalog was designed to help you make the best purchasing decisions based on your needs. It now provides essential information about each variety, ensuring you find exactly what you are looking for. Here's a guide to our new labels and data provided :

BOTANICAL CATEGORY:

We categorize our roses as either **Spray** (multiple heads) or **Tea Hybrid** (single head). Our spray roses come with data indicating the **number of heads per stem** observed on a 50 cm stem over the past year.

HEAD SIZE:

Different head sizes serve different purposes in bouquets. We now include the head size for all our TH and spray roses, giving you a clearer idea of what to expect. These sizes are averages observed over the past year, **at cut stage**.

VASE LIFE DATA:

Instead of providing an average vase life, we now offer a range (**minimum to maximum** based on observations over the past year) to better reflect the potential and quality of each variety.

LENGTH PROFILE:

We provide the average size of stems observed over the past year for each variety. This information is very useful for those focusing on very long or very short stems, allowing you to see which varieties best suit your needs.

"NEW" STICKERS:

Varieties that are new to our farm are marked with a "NEW" sticker. Don't hesitate to inquire about them and request samples.

"RL3" STICKERS:

Varieties grown in Red Lands 3, our farm expansion, are marked with an olive green "RL3" sticker. These varieties will be available in larger quantities by January 2025 when the expansion is completed. This means you will be able to order larger numbers of stems for these varieties, and we should be able to supply them in good quantities, even in solid boxes. Some of these varieties are still young and planted for multiplication, but some are already available in large quantities.

"CLASSIC" LABELS:

We understand that our gardens & specialties are show stoppers. But our farm also features premium classic spray roses, now marked with a beige "CLASSIC" label. These varieties offer great vase life, beautiful color, and a good number of heads per stem, and are often more affordable than our garden & specialties sprays. Choosing these premium classic spray varieties can increase your chances of receiving better numbers for your orders, as they have less demand compared to garden & specialties sprays.
